## Lista de las aves argentinas

Aves Argentinas es la organización nacional, miembro de BirdLife International, que con 100 años de trayectoria, trabaja para salvar las aves silvestres y la naturaleza de Argentina, desarrollando proyectos y actividades de conservación, investigación, educación y divulgación. Colabora con otras organizaciones buscando estimular en las personas la pasión por las aves. El Ministerio de Turismo de la Nación y la Administración de Parques Nacionales apoyan estas iniciativas para el desarrollo y promoción de la observación de aves en la Argentina.

La presente Lista de las aves argentinas tiene como objetivo principal, brindar una herramienta práctica para los miles de observadores de aves que recorren las distintas regiones del país.

Se omiten de la lista algunas pocas especies cuyas menciones para el país se basan en datos escasos. Es altamente probable que sigan apareciendo nuevas especies para la avifauna Argentina. En caso de observar alguna especie que no figure en este listado se sugiere subir el registro al portal eBird ([www.ebird.org/Argentina](http://www.ebird.org/Argentina)), idealmente acompañado de fotografías o grabaciones.
